

8L.1.2 Performance Task

Use the below diagram to answer the following questions

Influenza Pandemic	# of fatalities	Year
Spanish influenza	40-50 million	1918
Asian Influenza	2 million	1957
Hong Kong Influenza	1 million	1968
H1N1 Swine Influenza	203,000	2009

1. What do you see in the above data table?
2. Evaluate the data table and, in the space below, discuss possible reasons for a decline in the fatality rate. Then write your conclusion in the space provided.

Create a graph below to illustrate the data chart above. Be sure to label the X and Y axis as well as the individual data (you *may* create a KEY if necessary). *Numbers are in millions
